## THE DISCOVERY CHALLENGE

EXPLORING

### EVENT INFO

TIME: 3 HRS-1 DAY | NUMBERS: 10-400 | LOCATION: OUTDOORS | APPROACH: COMPETITIVE

### Realistically dealing with planning versus action.

Bringing satellite technology together with an adventure that takes in history, mystery and fascinating locations, **The Discovery Challenge** takes teams on an exciting and challenging journey. Specially designed to take place in major cities, **The Discovery Challenge** generates a strong spirit of teamwork, competition and fun.

Teams rotate around a series of waypoints, guided by GPS devices and ancient 'quest wheels'. Each wheel holds the clues to the adventure – once the teams have worked out how to decipher its mysteries and break the code. At each waypoint

is a challenge or puzzle to solve that draws on the history, culture and landmarks of the city and tests the mental, physical and creative capabilities of the participants. Conference or product messages can be easily integrated within the challenges themselves.

With each completed challenge the teams are given the co-ordinates of their next waypoint and a cryptic clue as to the challenge they will find there. With some challenges they will be left to their own devices – at others they will meet characters who will assist them or pass on vital information.

At the completion of the last challenge the teams will have all the information they need to use the 'quest wheel' to reveal the location of the final destination where scores and adventures are compared.

**The Discovery Challenge** will bring out the Indiana Jones in every member of your organisation, get them working with others in unconventional ways and leave them with a unique memory of an amazing shared experience.
